

# Atrial Fibrillation

## Health Trainers and HCAs

It Matters

Do you take blood pressures ?

Do you take pulses ?

# Why

For QOF

Its in the template for older people

To see if it is too fast

Its part of the healthcheck

It matters but I don't really know why

When the machine says error

Its something to do with having a stroke

# How

# Do you talk to people ?

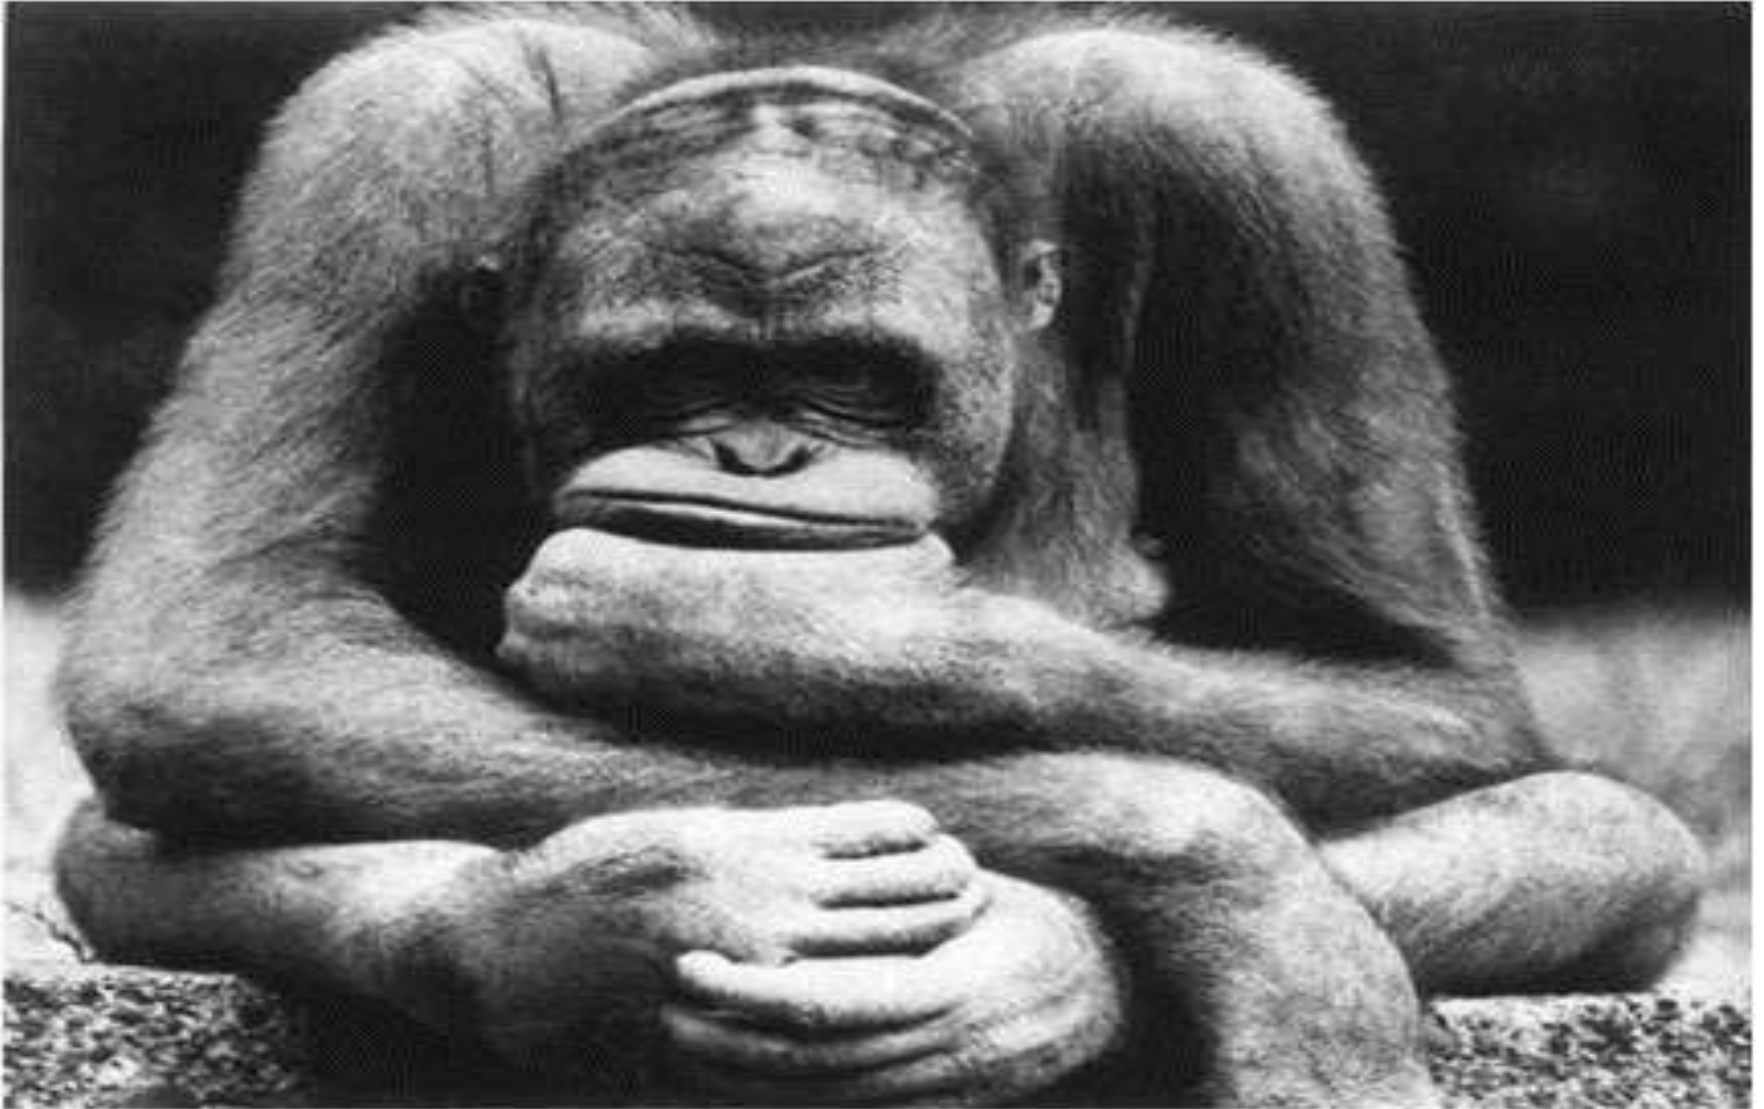

## THE NURSE

A nurse's job is to look after people who are ill. Hospitals are full of sick people who need special care to help them to get better. These sick people are called patients. Many nurses work in hospitals, taking care of the patients.

Doctors in the hospitals find out about the patients' illnesses. Then the doctors tell the nurses what to do to help the patients to get better. The nurses carry out the doctors' orders and care for the
