

West Midlands Cardiovascular Strategic Clinical Network

Using data to improve the detection and management of Atrial Fibrillation

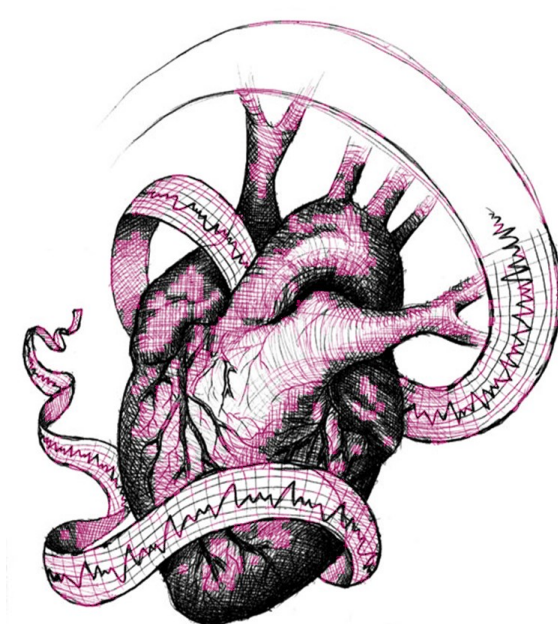

Providing this analysis of QOF data against NICE guidelines opened up conversations with the CCGs.

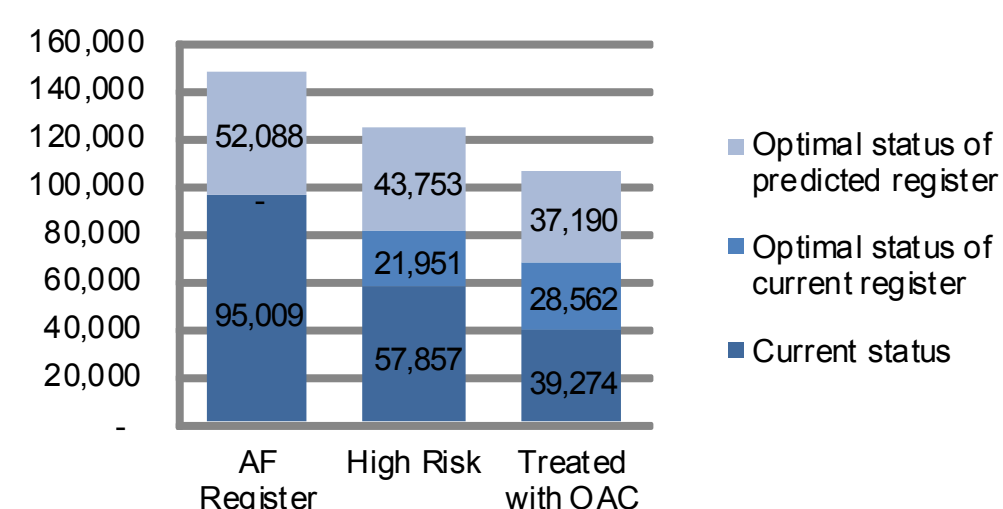

A regional event chaired by Professor Sir Muir Gray in 2014 included examples of improvement from around the country. The event was delivered again in 2015 but with examples of improvement in the region, reflecting the excellent work that had been done in the last year

A good practice guide is available at www.wmscnsenate.nhs.uk

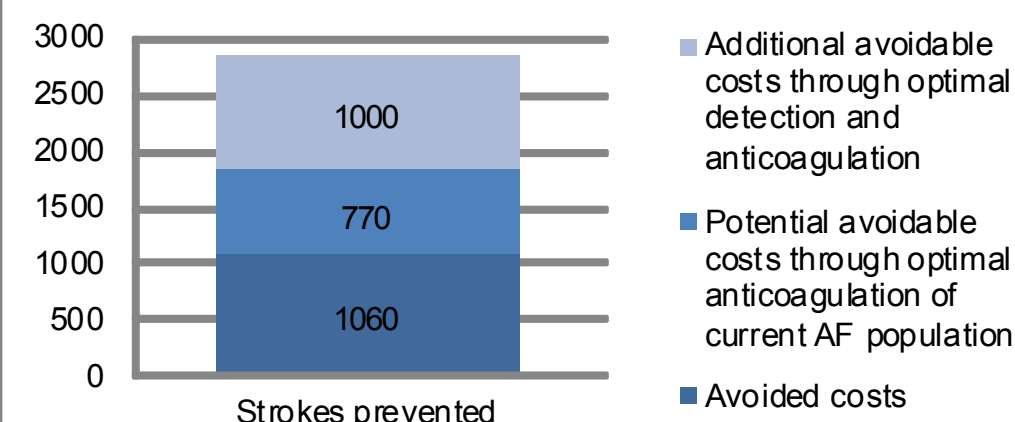

We are now working with a range of stakeholders (PHE, AHSN, Stroke Association, Universities, RCGP, industry) in the region to identify and collaborate on further opportunities for strategic intervention.

AF: potential for change

Estimated number of preventable strokes

Savings from AF stroke prevention
