

HOW TO BUILD YOUR PAPER STAND

1

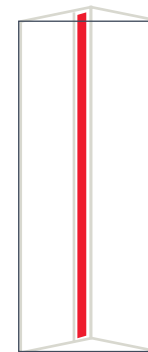

Fold tab backwards.

2

There are two vertical markers at the top and bottom of the page, use these as guides to start your folds. You should be left with a triangular vertical shape with all printed sides visible.

3

Use adhesive on the inside of the tab. We advise either a glue stick, double sided tape or sticky tape.

**FUNDING RESEARCH.
SAVING LIVES.**

LIVES LIKE JACK'S.

Only hours after Jack was born, he turned blue. He needed open heart surgery. So less than a week later, doctors performed a life saving operation pioneered by a BHF Professor. Thanks to that operation, Jack is now a happy six year old with a passion for football. Jack is why we fight, and why your support means so much. Thank you.

Jack, Survivor

HEARTBEAT**
bhf.org.uk

£10

£10 pays for a researcher toolkit, containing all the test tubes, flasks, dishes and gloves a busy team of heart attack researchers will use in a day.

£50

Researchers regularly need to measure the levels of specific chemicals in tissue or blood samples. **One testing kit costs at least £50.**

£100

£100 pays for a whole day of research by an early career heart scientist. BHF funds around 500 post-doctoral scientists working to better understand how to diagnose, prevent, treat and cure heart disease.

Thank you for your support.
