About British Heart Foundation

bhf.org.uk

For over 50 years we've supported pioneering research that's transformed the lives of people living with heart and circulatory conditions.

Our work has been central to the discoveries of vital treatments that are helping to save lives of people of all ages across the UK. But so many people still need our help. From babies born with life-threatening heart problems to the many Mums, Dads and Grandparents who survive a heart attack and endure the daily battles of heart failure. Every pound raised, minute of your time and donation to our shops will help make a difference to people's lives.

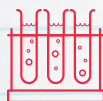

#PackForGood

Pack For Good is the only free dedicated charity campaign targeted at universities, landlords, student accommodation providers and students. The campaign encourages both our partners and students to donate unwanted items from clothing to furniture throughout the year, these items then go on to be sold in one of over 670 shops and stores across the UK.

Partnerships

We work with over 100 universities, 10 local councils, 11 national private student accommodation providers and many more local providers across the UK. The campaign is mutually beneficial, fully tracked with yearly reporting and supported by a dedicated team. If you would like more information about the campaign, please contact packforgood@bhf.org.uk

Your Donations

The funds raised by donations from our partnerships could help the British Heart Foundation to fund the support of a PhD student, an hour of research by early career scientists, buy test tubes to help researchers with their research into inherited heart conditions and help researchers visualise faulty heart valves under the microscope.

Sustainability

Not only does the campaign help raise millions of pounds to fund lifesaving research, in one year, the campaign can save over 2,000 tonnes of items going to waste. Through the reuse and recycling of donated items this could help prevent over 20,000kg of CO₂ being released into the atmosphere contributing to both local and global sustainability goals, in turn helping to save the planet whilst saving lives.
